

## HOUSING AND NEIGHBORHOODS FOR ALL

# Missing Middle Housing and Multigenerational Communities

Join AARP, 1000 Friends of Oregon, Portland for Everyone and Urban Land Institute for an engaging morning of dialog about housing, land use and creating communities for all ages.

Learn about “Missing Middle Housing” from the man who coined the term — nationally known architect and urbanist Daniel Parolek of Opticos Design, Inc. Daniel will describe the full range of Missing Middle Housing options and trends in America’s residential landscape that often limit housing choice. Local experts will discuss housing trends, challenges and barriers to aging in community and meeting our region’s growing need for affordable, accessible, and age-friendly housing. Join us for this important conversation and be part of the solution.
